Tiffany is a contemporary abstract artist, influenced by the natural beauty and sweeping landscapes of the Pacific Northwest. Having grown up on the North Shore, she truly has an appreciation for nature's vibrancy and colours, which find its way into each and every handcrafted piece.

She uses acrylics, textured pastes, resin, and recycled materials to create original mixed media paintings. Not only do the textures and resins really bring depth and emotion to each piece, they tell an interesting narrative. The viewer might want to touch them, question them, be a part of them or be transported to an unimaginable place.

Her latest works, "From the Rooftop" captures the beauty of our city through the abstract eye. Having limited space in her home, Tiffany decided to take her creativity to the rooftop and let the city inspire her.

She's been featured at CityTV and Breakfast Television, Raw Artists, Art in the Garden, Pacific Arts Market and many other venues through out the lower mainland. June 2019, Tiffany heads to New York where her work will be featured at the Agora Gallery for three weeks. Follow her on her journey at **tiffanyreidart.com** or on instagram at **tiffanyreidart**
